not bad for a time killer the servers are quite dead tho. Altitude is a fun addicting game in which you fly around in planes shooting other planes to get better planes.. One of my favorite games back in the day!. Its really nice and dandy and all.. The Red Baron would cry tears of joy for this game. Wow, I'm surprised I haven't recommended this game already. I'd say that this was the first Indie game I played on Steam and I still think to this day it is one of the best.. I remember when i actually paid for this

---

game years ago, and even after picking it up after all this time i still had a blast. Even though the community isnt what it used to be, this game is still tons of fun.. toxic community and the game is dead. ( average population: 40 players ) don't waste your time. someone might kick you out of the server for no reason.. elitism killed this game total junk
